| Quick, hassle-free, drop-in paper loading | X |
| Compact design | X |
| Complete support and easy installation | X |

* Processes debit and EBT transactions with additional peripherals.

† Wi-Fi terminals are separate products. Wi-Fi supports only the WPA-PSK Security Mode with the TKIP Encryption Mode. Your routers must support this configuration to use these terminals on your wireless LAN.

The FD terminals may not be compatible with another processor's system. In the event you elect to use another processing service provider, you may not be able to use this equipment with their service.
